SOLAN

SOLAN

Sean Landers was a motocross champion and a contender for the national champion. On the eve before his shot at the title he was in horrible car accident.

They rushed him to the hospital. He was comatose for nearly two months. When he woke, he learned that his spine had suffered a lot of damage. The doctors told him he could become paralyzed and that he should never compete again. Sean lay in his hospital bed for many more weeks struggling to find a reason to live. Day by day his muscles became weak. Common tasks became unbearable. Pound by pound, beat by beat, the life that the doctors saved slipped away.

They transferred him from the IC unit to the rehabilitation ward. Sean expected the worst. But what he didn't expect was "her." Shayna arrived to lead him away from his life of Chaos toward a greater possibility. To find his way back, he would need to put his faith in her wisdom. This beautiful stranger and magical nurse would become his teacher. With care and guidance, she slowly began to rehabilitate Sean. She guided him back physically, mentally and emotionally.

Inspired by her teachings and her visions of the SHAKTI Academy, he enrolled. Sean rose through the ranks quickly. He attained Super Hero status within months. He was given the name Solan and he re-emerged. He now commits his life to empowering children all over the world to fight against Chaos. And he helps them develop the Super Hero within.
